

- Operators can distance themselves from the tyre during standard inflation with 100% control via free Workshop Connect App
- Data reports - robust technician audit trail and logging of vital data to provide safety and peace of mind for operators and consumers alike
- Ideal for garages, tyreshops, dealerships, car hire, roadside assistance vehicles, MOT centres and automotive production lines

 **Bluetooth® enabled**

ACCURA QUBE TYRE INFLATOR

Connect via the free **PCL WORKSHOP CONNECT** app to allow remote inflation and data reporting.

A firm favourite in workshops, tyreshops and garages worldwide, the robust yet attractive ACCURA QUBE has the market boxed off for fast accurate inflation and now the unit has become SMART with its latest Bluetooth enabled model.

Designed to connect to the new PCL Workshop Connect App, operators of the Bluetooth enabled ACCURA QUBE can build a database of inflation

data through the apps reporting mechanism - each inflation is recorded and downloaded as PDF and CSV file.

Ideal for HGV roadside tyre maintenance, the Bluetooth enabled model features a 15-metre operating range, allowing the operator to keep out of harm's way in case of tyre failure during inflation.

A HORNGROUP BRAND

ACCURA QUBE TYRE INFLATOR

Features and benefits:

- Space-saving and lightweight design
- Fast accurate inflation / deflation rates
- Ceramic sensor ensures accuracy to $\pm 0.5\%$ of full scale reading
- Guaranteed accuracy - supplied with calibration certificate
- Pre-set function enables the operator to carry out other tasks during the inflation/deflation process
- Standalone solution or can be retro-fitted around existing equipment
- Bluetooth enabled - works with the PCL Workshop Connect App
- 15-metre Bluetooth range allows user to inflate tyre from a distance

USERS OF THE BLUETOOTH ENABLED QUBE CAN DOWNLOAD THE FREE PCL WORKSHOP CONNECT APP AND BENEFIT FROM:

- Quick input of vehicle information
- PDF output with before and after tyre pressures
- CSV output to build client data
- Flat/damaged tyre and over inflation notifications
- Security enabled pairing
- Emergency stop function
- 100% standard inflation control from a 15-metre distance
